Emily,

I have two quotes for work at Caesar Creek. One is for chip-sealing and striping (Strawser), the other is for pavement repair (Pavement Management). Please let me know if these are appropriate or if I need to do something additional.

*-Gus*

Hi Gus –

ODOT will be able to use the 101G Contract for funding in the road repair at Caesar Creek State Park. Before proceeding with the order, we need to make sure that we are using the lowest responsible vendor.

Thanks,

Emily

Gary/Emily,

I have money budgeted for some road repairs at Caesar Creek State Park. I would like to use the 101 contracts to get the repairs done this spring. We were able to get these things accomplished at Cowan Lake last year, but I recall there were some issues with how we went about getting the work done. Caesar Creek is going to be a smaller project and more focused on repair work and chip-seal on a few roads. I would like to work with you on getting this work completed this spring. I am working again with Strawser and Pavement Management on some estimates. Please let me know how you would like to proceed.

Also, I have money set aside for FY 2015 that will likely be partially used at Caesar Creek as well as some other facilities in your district. I would like to start coordinating on these projects soon as well.
